DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 14-16, 20-23, 25-28 remain rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement, for reasons of record. Applicant argues that the examiner must provide references or explain the reasons for doubting the objective truth of applicant's statements, and that the inconclusive studies cited are not inconsistent with applicant's assertions. The previous Office action pointed to the unpredictability of the art of physiology and medicine, and the absence of working examples of the claimed treatment method. "When a patent applicant chooses to forego exemplification and bases utility on broad terminology and general allegations, he runs the risk that unless one with ordinary skill in the art would accept the allegations as obviously valid and correct, the examiner may, properly, ask for evidence to substantiate them." *Ex parte Sudilovsky*, 21 USPQ2d 1702, 1705. One skilled in the art of medicine would not have accepted the allegations as obviously valid and correct, considering the contemporary absence of knowledge of the effectiveness of clinical interventions (except the limited effectiveness of steroids) on SARS. Although later in vitro studies did show that interferon had an antiviral effect on SARS infection in culture, the medical art does not accept that tissue culture assays reliably predict efficacy in treating or preventing disease in an individual. The limited clinical data available to date do not substantiate applicant's assertions that IFN- α or IFN α + γ are effective in treating or preventing or reducing the risk of SARS; therefore it is maintained that more than

routine experimentation would be would be required to practice the claimed body-treating methods.

Double Patenting

Claims 20-23, 25-28 remain provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-13 of copending Application No. 10/552020, for reasons of record. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented. Applicant did not argue this rejection; applicant's intention to file a terminal disclaimer upon agreement of allowable claims, is noted.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
